

## **Lam Soon (Thailand) Public Company Limited**

### **Energy Management Policy**

Lam Soon (Thailand) Public Company Limited realizes the importance of efficient energy use. The conservation of energy is considered as a part of the organization's operation, and the corporate executives must focus on energy management practices; therefore, guidelines for energy operations have been established in order to promote the maximum efficient and effective energy use as follows:

1. Support the corporate executives and employees at all levels to realize the importance and to be aware of energy conservation by operating according to energy management guidelines.
2. Encourage the implementation of continuous efficiency improvement of energy use of organization and suitable for the industry to focus on the efficient energy use and reduce production costs.
3. Operate and develop an appropriate energy management system to be consistent with relevant laws and other requirements.
4. Support sufficient information and resources allocation to achieve goals, including providing energy-saving products or services.
5. Encourage training on energy conservation to educate knowledge and make understanding of employees within organization and have guidelines that are in the same way.
6. Review and improve energy policies, goals and plans at least once a year.
